

Amendments to the Specification:

Please amend the specification as follows:

Page 26, delete the first full paragraph, lines 6-17 and replace this paragraph with the following:

While the image display ~~devicees~~ devices of the first to third embodiments according to the present invention have been explained above, the present invention is not limited to these embodiments. A person skilled in the art could easily conceive of various embodiments and modifications based on the above embodiments. For example, in the circuit wiring on the TFT array substrate shown in Fig. 2, a structure is employed in which a data line and a plurality of scan lines give potentials to adjacent pixel electrodes that sandwich the same data line. However, the application of the present invention is not limited to this wiring structure. It is possible to apply the present invention to the image display device that has a plurality of surface wires regardless of a driving system and a wiring structure.
